PATENT ASSIGNMENT AGREEMENT

This Assignment Agreement ("Agreement"), made and effective on the last date of execution as indicated below, is by and between Enersafe Corporation ("Enersafe"), a Wisconsin corporation of 3700 Quick Drive, Franksville, Wisconsin 53126, and Tekmax Inc. ("Tekmax"), an Oregon corporation of 32220 E. Old Hwy. 34, Tangent, Oregon 97389. John K. Shannon ("Shannon") personally joins as a party in view of the provision on a possibility of consulting and to join in the assignment of patent assets.

For good and valuable consideration, the receipt of which is acknowledged, the parties agree as follows:

Assignment of Patent Assets

1. Assignment of Subject Patents. Enersafe hereby assigns to Tekmax all right, title and interest in the patents and patent applications listed in attached Schedule A, including all inventions disclosed and claimed therein, any and all related patents and patent applications arising in any way therefrom (including any reissues, continuations, continuations-in-part, extensions, and confirmations or other counterpart patents in any country), whether filed or unfiled, all rights of action, and any and all other rights pertaining thereto. Such patents and patent applications are referred to herein as the "Subject Patents."

2. Follow-up Cooperation on Documents. Upon execution of this Agreement, Enersafe will also execute a Patent Assignment in the attached form (with Schedule A) for recording purposes. If ever requested by Tekmax, Enersafe will execute any additional assignment-related documents for the purpose of recording Tekmax's ownership.

3. Assignment of Certain Inventions. Enersafe and Shannon hereby assign to Tekmax any and all prospective patent rights in the following improvement concepts: (a) pouring hot melt into battery cover on poured lead (rather than using pre-applied hot melt), so that heat of fusion of the hot melt is not drawn from the poured strap lead; (b) induction pre-heating of plate lugs just prior to dipping into the plate strap lead; and (c) feeding the lead reservoir with melted lead (e.g., a melted lead wire feed), rather than adding solid lead to the reservoir. If Tekmax pursues patent protection on such concepts, Shannon will cooperate with Tekmax by executing patent application papers as requested, including formal assignment papers.

Payment Obligations for Assignment

4. Initial Tekmax Payment. Immediately upon Enersafe's showing to Tekmax that the required steps have been taken to record the above-noted Patent Assignment in the U.S. Patent & Trademark Office, Tekmax will send Enersafe (by overnight courier to Enersafe's attorney) a check for Four Hundred and Five Thousand Dollars (\$405,000) payable to Enersafe Corporation.

5. Battery-Based Royalty-Sharing. If Tekmax, any time during the life of the Subject Patents, enters into a license agreement with a customer that acquires from Tekmax a battery-making machine which is covered by, and/or makes batteries covered by, one or more of the Subject Patents, and such license agreement generates royalties based on the customer's sales of batteries made using such machine, then Tekmax will pay Enersafe (a) one-half of such royalties

received by Tekmax from such customer or (b) one-quarter percent (0.25%) of the subject battery sales of such customer, whichever is greater. Tekmax will make royalty reports for each calendar quarter and royalty-sharing payments, if due, will be paid within forty-five (45) days of the close of the calendar quarter. Enersafe will have the right to review Tekmax's records periodically (but no more than once annually) to confirm the accuracy of royalty reports. Nothing herein obligates Tekmax to enter into such an agreement with any of its customers.

6. Payments in Lieu of Battery-Based Royalty-Sharing. If Tekmax does not enter into a license agreement as referred to in paragraph 5 above with a customer acquiring from it a battery-making machine which is covered by, and/or makes batteries covered by, one or more of the Subject Patents, then Tekmax shall instead pay Enersafe a one-time payment for such battery-making machine based on the production capacity of such machine, as follows:

- Ten Thousand Dollars (\$10,000) if the machine is a lab-test machine;
- Twenty Thousand Dollars (\$20,000) if the machine is a machine having a capacity no greater than one (1) battery per minute;
- Thirty Thousand Dollars (\$30,000) if the machine is a machine having a capacity of more than one (1) but no greater than two (2) batteries per minute; or
- Fifty Thousand Dollars (\$50,000) if the machine is a machine having a capacity greater than two (2) batteries per minute.

The per-machine payment for any machine shall be made within thirty (30) days of delivery of such machine to the customer. Such payment requirement applies to machine sales during the life of the Subject Patents; the Subject Patents will not be allowed to expire early to avoid such payment obligations.

7. No Further Payments. Tekmax shall have no other payment obligations to Enersafe.

Further Enersafe/Shannon Obligations

8. Follow-up Cooperation on Patent Matters. Enersafe and Shannon will cooperate with Tekmax in patent filing and prosecution matters as reasonably requested, doing so without charge to Tekmax for services.

9. Availability for Consultation. Shannon will be available for telephone consultations as reasonably requested by Tekmax.

10. Enersafe/Shannon Non-Competition. Enersafe and Shannon shall refrain from competing with Tekmax in manufacture and sale of battery-making machines and refrain from entering into a battery-manufacturing business. Such non-competition obligations are world-wide in scope and extend for ten (10) years from the date of this Agreement.

115 - 3

11. New Inventions/Developments and Tekmax First-Look Rights. Notwithstanding the foregoing, Enersafe and Shannon remain free to engage in battery-related invention, development and licensing activities; however, Enersafe and Shannon agree that, before licensing or otherwise transferring any battery-related invention to any third party, Enersafe and Shannon will disclose such invention to Tekmax and provide Tekmax an opportunity to acquire such invention.

Miscellaneous Provisions

12. Future Assignment by Tekmax. As long as any of the above payment obligations remains in effect, any assignment of the Subject Patents and/or of this Agreement by Tekmax to a third party will require that Enersafe provide its consent to such Tekmax assignment; however, Enersafe's consent cannot be withheld except for reasons related to assurance that any remaining payment obligations will be satisfied.

13. Limited Reversionary Rights. While the above payment obligations remain in effect, the occurrence of certain events or conditions (see below) shall cause reversion of ownership of the Subject Patents to Enersafe. Such events and conditions are: (a) Tekmax and its owners ending their business without sale thereof to a third party; (b) a Tekmax bankruptcy; and (c) a reversion notice by Enersafe based on a breach by Tekmax of a payment obligation which is not cured by Tekmax within sixty (60) days of a written notice of such breach to Tekmax.

14. Entire Agreement. This Agreement replaces any and all previous agreements between Enersafe and Tekmax and contains the entire understanding of the parties with respect to the Subject Patents, assignment thereof, and related matters. Any amendment shall be in a written document signed by the parties.

15. Execution and Form. This Agreement may be signed in counterpart -- i.e., with the parties signing separate duplicate originals. Faxed executed copies of this Agreement shall be as effective as originals.

The parties have indicated their agreement to the foregoing by signing below.

ASSIGNMENT

1. WHEREAS, Tekmax, Inc. of 32220 East Highway 34, Tangent, Oregon 97389, a corporation duly organized and existing under and by virtue of the laws of the State of Oregon (hereinafter referred to as Assignor), is the owner of the entire right, title, and interest in and to certain letters patent of the United States and the inventions disclosed therein; and to certain applications for letters patent of the United States and the inventions disclosed therein; and

2. WHEREAS, Tekmax Acquisition Company of 14515 North Outer Forty Drive, Suite 300, Chesterfield, Missouri 63017, a corporation duly organized and existing under and by virtue of the laws of the State of Delaware (hereinafter referred to as Assignee), is desirous of acquiring said right, title, and interest of Assignor;

3. NOW, THEREFORE, in consideration of the sum of one dollar (\$1.00) and other good and valuable consideration by Assignee to Assignor in hand paid, receipt of all of which is hereby acknowledged, Assignor has agreed to and does hereby sell, assign and transfer unto Assignee, its successors and assigns, all of Assignor's right, title and interest in and throughout the United States of America (including its territories and

dependencies) and all countries foreign thereto, in and to said letters patent and all reissues thereof and reexamination certificates therefor, and the inventions disclosed therein, including Assignor's full right to sue for and recover all damages recoverable from past infringements of said letters patent; including specifically, without limiting the generality of the foregoing, the United States patents listed below; and Assignor has further agreed to and does hereby sell, assign and transfer unto Assignee, its successors and assigns, all of Assignor's right, title and interest in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto, in and to said inventions, said United States applications, any other United States applications (including provisional, non-provisional, divisional, continuing, or reissue application) based in whole or in part on said United States applications or in whole or in part on said inventions, any foreign applications based in whole or in part on any of the aforesaid United States applications or in whole or in part on said inventions, and any and all patents (including extensions thereof) of any country which have been or may be granted on any of the aforesaid applications or on said inventions or any part thereof; including, specifically, without limiting the generality of the foregoing, the United States applications listed below.

4. TO BE HELD AND ENJOYED BY Assignee, its successors and assigns, to the full ends of the respective terms full for which said patents have been or may be granted, as fully and entirely as the same would have been held and enjoyed by Assignor had this sale and assignment not been made.

5. AND Assignor hereby authorized and requests the Commissioner of Patents and Trademarks of the United States of America to issue any and all United States patents which may be granted upon said United States patent applications to Assignee, its successors and assigns.

6. AND Assignor hereby agrees to execute without further consideration any further lawful documents and any further assurances, and any provisional, non-provisional, divisional, continuing, reissue or other applications for patents of any country, that may be deemed necessary by said Assignee, its successors or assigns fully to secure its interest as aforesaid in and to said inventions or any part thereof, and in and to said several patents or any of them.

7. AND Assignor covenants that Assignor has granted no right or license to make, use or sell said inventions to anyone except said Assignee, that prior to the execution of this deed,

Assignor's right, title, and interest in said inventions has not been otherwise encumbered, and that Assignor has not executed and will not execute any instrument in conflict herewith.
